

AMENDMENTS TO THE CLAIMS:

This listing of claims will replace all prior versions, and listings, of claims in the application:

LISTING OF CLAIMS:

Claim 1 (currently amended): A display device comprising a display panel with a substrate, and a frame including a supporting portion for supporting the display panel on the periphery thereof and on a principal surface of the substrate,

wherein the supporting portion includes a flat portion and a first curved portion, which are opposed to the principal surface of the substrate, the first curved portion being continuous with the flat portion, and

wherein the principal surface of the substrate is fixed onto the flat portion either directly or indirectly, and

wherein while no external force is being applied to the substrate, a gap is left between the principal surface of the substrate and the first curved portion; wherein the display device dynamically displays information for an electronic device.

Claim 2 (original): The display device of claim 1, wherein the supporting portion includes a second curved portion that faces the first curved portion.

Claim 3 (previously presented): The display device of claim 1, wherein the principal surface of the substrate is fixed onto the flat portion with an adhesive layer.

Claim 4 (previously presented): The display device of claim 1, further comprising a reinforcing plate between the principal surface of the substrate and the flat portion of the supporting portion.

Claim 5 (original): The display device of claim 4, wherein the reinforcing plate is

fixed onto the flat portion with an adhesive layer.

Claim 6 (previously presented): The display device of claim 1, wherein the supporting portion is made of an elastic material.

Claim 7 (previously presented): The display device of claim 1, wherein the substrate is a plastic substrate.

Claim 8 (previously presented): The display device of claim 2, wherein the principal surface of the substrate is fixed onto the flat portion with an adhesive layer.

Claim 9 (previously presented): The display device of claim 2, further comprising a reinforcing plate between the principal surface of the substrate and the flat portion of the supporting portion.

Claim 10 (previously presented): The display device of claim 9, wherein the reinforcing plate is fixed onto the flat portion with an adhesive layer.

Claim 11 (previously presented): The display device of claim 2, wherein the supporting portion is made of an elastic material.

Claim 12 (previously presented): The display device of claim 2, wherein the substrate is a plastic substrate.
